GENERAL INDEX

— A —

Absorption changes, light induced, in photosynthetic organisms, 184

Absorption spectra and relative photostability of the different forms of chlorophyll in Chlorella, 305

Abstracts of papers presented at the meetings sponsored by the American Society of Plant Physiologists held at Pennsylvania State University, University Park, August 30-September 2, 1959. i-xxii.

Accumulation, potassium, in corn root mitochondria, 621

Acid scarification, effect on lupine seed impermeability, 107

Activation of germination in Douglas fir seed by hydrogen peroxide, 557

ADAMS, M. W. See SWANSON, C. R., 372

Adenine, enzymatic degradation of adenosine triphosphate to, 153

Adenosine triphosphate, enzymatic degradation of to adenine by cabbage leaf preparations, 153

Adenosine triphosphate, possible role in rubidium absorption as revealed by influence of external phosphate, dinitrophenol, and arsenate, 645

After-ripening cherry seed, growth, translocation and respiratory changes in the embryonic organs of, 131

Airflow planimeter for measuring the area of detached leaves, 532

Alaska pea seedlings, growth responses to visible radiation and gibberellic acid, 460

Alfalfa, isolation of two quinones with coenzyme Q activity from, 546

Alfalfa seedlings, some metabolic responses to freezing, 372

AL-TALIB, KHALIL H. The aseptic culture of isolated buds of *Pseudotsuga taxifolia*, 630

Alteration of the protein components and other constituents in the tobacco leaf by shading, 563

American Society of Plant Physiologists, amendment to by-laws, 487

American Society of Plant Physiologists, annual business meeting, report of, 93

American Society of Plant Physiologists, executive committee, report of, 90

American Society of Plant Physiologists, midwest section, fifth annual meeting, 487

American Society of Plant Physiologists, northeastern section, 23rd annual meeting, 586

AMESZ, J. See DUYSENS, L. N. M., 210

Amide metabolism in higher plants. III. Distribution of glutamyl transferase and glutamine synthetase activity, 541

Analysis of auxin-gibberellin interaction in pea stem tissue, 16

ANDERSON, J. M. See BLASS, U., 329

Ankistrodesmus braunii, relation between respiration and photosynthesis in green alga, 224

Annual plants, flowering in, as affected by purines, pyrimidines and triiodobenzoic acid, 605

Antagonisms, molybdenum-manganese-iron, in the nutrition of tomato plants, 608

Anthocyanin synthesis in corn endosperm tissue cultures. I. Identity of the pigments and general factors, 536

Anthocyanins, identification in petals of tulip varieties Smiling Queen and Pride of Haarlem, 494

Apples, occurrence of free galacturonic acid in, 389

Arenaria peploides L., latitudinal effect on respiration in some northern plants, 574

Arsenate, possible role of adenosine triphosphate in rubidium absorption as revealed by influence of, 645

Ascorbic acid in pyridine solutions, photoreduction of chlorophyll a in the presence of, 246

Ascospores of *Neurospora tetrasperma*, endogenous substrates of, 466

ASEN, S. See HALEVY, A. H., 494

Aseptic culture of isolated buds of *Pseudotsuga taxifolia*, 630

Atmospheric fluorides, effects of on the respiration of leaf tissue, 11

Authors, information and instructions for, 94, 587

Auxin-gibberellin interaction in pea stem tissue, an analysis of, 16

Auxin-membrane permeability relations in fruit and leaf tissues, studies on, 365

AVRON, MORDHAY, See KROGMANN, DAVID, W., 272

— B —

Bacterium, photosynthetic non-sulphur purple *Rhodopseudomonas spheroides*, pigment carrying structures of, 338

BAK, R. See KESSLER, B., 605

BANNISTER, THOMAS, T. Photoreduction of chlorophyll a in the presence of ascorbic acid in pyridine solutions, 246

BAR-AKIVA, A. The effects of triiodobenzoic acid and urea on the response of chlorotic lemon (*Citrus limonia*) trees to foliar application of iron compounds, 641

Barley grains, influence of temperature on the response to potassium gibberellate, 473

Barley, heat-damaged, formation of embryo starch during germination as an indicator of viability and vigor in, 500

Barley leaves, formation of β-phenylglucoside in, 142

Barley, Oderbrucker, heat-damaged, formation of embryo starch during germination as an indicator of viability and vigor in, 500

Barley plants, studies on the mechanism of herbicidal action of 2-chloro-4,6-bis(ethylamino)-s-triazine, 432
Barley roots, carbon dioxide fixation and salt uptake in particulate preparations from, 527
Barley roots, fixation of carbon dioxide in particulate preparations from, 520
Barley roots, soluble pyridine nucleotide oxidase system from, 589
Barley seedlings, effect of 2,3,6-trichlorobenzoic acid and 2,6-dichlorobenzoic acid on the geotropic and phototropic responses of, 61
Bean plant, translocation of calcium in, 512
Bean seeds, loss of phosphorus-32 by plant roots after foliar application, 449
Beet extracts, an inhibitor of oxalic acid oxidase in, 583
Beevers, Harry See Carpenter, W. D., 403
Beevers, Harry, See Gaur, B. K., 427
Benson, A. A. Chloroplast lipids as carbohydrate reservoirs, 315
Benzoic acids, substituted, and related compounds, effects on the distribution of callus growth in tobacco stem explants, 117
β-Phenylglucoside, formation of in plant leaves, 142
Beta vulgaris Linn, an inhibitor of oxalic acid oxidase in beet extracts, 583
Biddulph, O. Translocation of calcium in the bean plant, 512
Biddulph, Susann See Biddulph, O., 512

Carbohydrate reservoirs, chloroplast lipids as, 315
C^{14}-bicarbonate, metabolism of by lettuce seed during germination, 376
CO_2, dark fixation of by tobacco leaves, 123
$C^{14}O_2$, improved technique for growth of Chlorella in, 638
Carbon dioxide burst in algae, further studies on, 219
Carbon dioxide concentration and temperature, effects on photosynthesis of Mimulus, 103
Carbon dioxide evolution by tomatoes, effects of growth-regulating substances on, 65
Carbon dioxide, factors affecting light induced fixation of by isolated spinach chloroplasts, 318
Carbon dioxide fixation and salt uptake in particulate preparations from barley roots, 527
Carbon dioxide fixation in particulate preparations from barley roots, 520
Carbon dioxide outburst and uptake in tobacco, 100
Carboxylation, dark, reactions in plant homogenates, effects of iron and chelating agents on, 446
Carotenoids, biosynthesis and possible functional relationships among, 329
Carpenter, W. D. Distribution and properties of isocitritase in plants, 403
Carrot discs, respiratory and associated responses to substituted phenols, 427
Castor beans, distribution and properties of isocitritase in plants, 403

Catabolic pathways for glucose in corn roots, use of specifically labeled glucose and gluconate in evaluation of, 580
Cell division in *Chlorella vulgaris*, nitrogen and sulfur changes associated with growth uncoupled from, 505
Cereal leaves, methods for the extraction of enzymes from, with especial reference to the triosephosphate dehydrogenases, 396
CHANCE, BRITTON The electron transfer system of skunk cabbage mitochondria, 33
Changes in endogenous growth substances during flower development, 409
Chelating agent effects on dark carboxylation reactions in plant homogenates, 446
Cherry seed, after-ripening, growth, translocation and respiratory changes in, 131
CHING, TE MAY Activation of germination in Douglas fir seed by hydrogen peroxide, 557
Chlamydomonas reinhardi, stability of isolated chloroplast preparations and its effect on Hill reaction measurements, 283
Chlorella ellipsoidea, on the mass culture of algae, 345
Chlorella, mechanisms of action of polymyxin B on, 380
Chlorella pyrenoidosa, absorption spectra and relative photostability of the different forms of chlorophyll in, 305
Chlorella pyrenoidosa, biosynthesis and possible functional relationships among the carotenoids: and between chlorophyll a and chlorophyll b, 329
Chlorella pyrenoidosa, further studies on the carbon dioxide burst in algae. 219
Chlorella pyrenoidosa in $C^{14}O_2$, improved technique for growth of, 638
Chlorella pyrenoidosa, influence of 2,4-dichlorophenoxyacetic acid on solute uptake by, 3
Chlorella pyrenoidosa, influence of selective light scattering on measurements of absorption spectra of, 193
Chlorella pyrenoidosa, mechanisms of action of polymyxin B on, 380
Chlorella pyrenoidosa, quinone poisoned, induction of fluorescence in, 204
Chlorella pyrenoidosa, sensitive stage in synchronized cultures of, 353
Chlorella pyrenoidosa, stability of isolated chloroplast preparations and its effect on Hill reaction measurements, 283
Chlorella pyrenoidosa, sulfate utilization by, 73
Chlorella, sensitive stage in synchronized cultures of, 353
Chlorella vulgaris, mechanisms of action of polymyxin B on, 380
Chlorella vulgaris, nitrogen and sulfur changes associated with growth uncoupled from cell division in, 505
2-chloro-4,6-bis(ethylamino)-s-triazine, studies on the mechanism of herbicidal action, 432
Chlorogenic acid synthesis in disks of potato tuber, some factors which affect, 108
Chlorophyll a and chlorophyll b, biosynthesis and possible functional relationships among the carotenoids, and between, 329
Chlorophyll a, photoreduction of, in the presence of ascorbic acid in pyridine solutions, 246
Chlorophyll b and chlorophyll a, biosynthesis and possible functional relationships among the carotenoids, and between, 329
Chlorophyll derivatives, reduction of by sodium borohydride, 310
Chlorophyll, formation and bleaching of in albino corn seedlings, 340
Chlorophyll in Chlorella, absorption spectra and relative photostability of the different forms of, 305
Chlorophyllides, reduction of by sodium borohydride, 310
Chlorophylls, reduction of by sodium borohydride, 310
Chloroplast isolation in nonaqueous media, 56
Chloroplast lipids as carbohydrate reservoirs, 315
Chloroplast preparations, isolated, and effect of stability on Hill reaction measurements, 283
Chloroplast preparations, spinach, photoreduction and photooxidation of cytochrome c by, 255
Chloroplast, spinach, photosynthetic phosphorylation, uncouplers of, 272
Chloroplasts, a pyridine nucleotide-cytochrome c reductase isolated from, 289
Chloroplasts, comparison of three photochemical activities of, 268
Chloroplasts, isolated, mechanism of photochemical activity of, 293, 301
Chloroplasts, isolated, ribulose 1,5-diphosphate carboxylast activity in relation to photosynthesis by, 651
Chloroplasts, isolated spinach, factors affecting light induced fixation of carbon dioxide by, 318
Chloroplasts, pyocyanine and phosphorylation with, 240
Chlorotic lemon (*Citrus limonia*) trees, effects of triiodobenzoic acid and urea on response of to foliar application on iron compounds, 641
Chromatic transients in the photosynthesis of a green alga, 200
Chrysanthemum morifolium, changes in endogenous growth substances during flower development, 409
Citric acid behavior in leaves of *Bryophyllum calycinum* Salisb., 418
Citrulline, metabolism of in mung bean mitochondria, 171
Citrus limonia, effects of triiodobenzoic acid and urea on response of chlorotic lemon trees to foliar application of iron compounds, 641
Citrus plants, foliar uptake of salt constituents of water by, during intermittent sprinkling and immersion, 22
Cladonia alpestris s.l., latitudinal effect on respiration in some northern plants, 574
Cladonia rangiferina s.l., latitudinal effect on respiration in some northern plants, 574

Cladonia sylvatica s.l., latitudinal effect on respiration in some northern plants, 574
